Cloud: Cloudflare, Workers, AWS, Firebase, Netlify, Docker, DNS, SSL, deployments

IT: Windows, TCP/IP, networking fundamentals, Linux fundamentals, Microsoft 365, Entra ID, Intune, Active Directory, Salesforce, Priority/CRM exposure

PROFESSIONAL EXPERIENCE

CodeCrafter | Founder & Full Stack Engineer - Business Systems, Integrations & Automation | 2015-Present

- Design, develop and implement CRM platforms, internal systems, portals and automation workflows.
- Translate client requirements into technical configurations, workflows and software solutions.
- Integrate applications, APIs, databases, email systems, Google Workspace and third-party SaaS.
- Configure authentication, roles, permissions, business logic and data access for multi-user systems.
- Troubleshoot frontend, backend, API, authentication, database and cloud infrastructure issues.
- Perform production QA, deployments, rollout support and direct client technical support.

AI Robotics Startup | Software Development Consultant & Mobile Arch

- Supported software and technical operations in a distributed development environment.
- Investigated integration issues spanning mobile apps, APIs, backend services and connected devices.
- Assisted with development environments, access configuration and technical troubleshooting.

IDF Technology Branch | Full Stack Software Developer & Team Leader | 2023-2024

- Developed and maintained full-stack internal software systems and databases.
- Led a four-person development team and provided technical guidance and troubleshooting support.
- Worked between user requirements and software implementation to improve internal workflows.
- Built reusable database/MySQL infrastructure and supported users of internal applications.

ADDITIONAL TECHNICAL EXPERIENCE

VidCo | AV Technician - Technical Support & Operations

- Set up and operated professional audio/video systems and digital meetings.
- Performed real-time troubleshooting and direct technical assistance for users and teams.

SELECTED IMPLEMENTATION PROJECTS

CodeCrafter CRM: React/TypeScript, Supabase Auth, PostgreSQL, RLS, Realtime, Google APIs, MFA.
RAM Engineering CRM: project/task workflows, multiple roles, Supabase, Google Workspace, Cloudflare.
Tov Ha'aretz: E2E QA, permissions, translations, caching, production troubleshooting and technical SEO.

EDUCATION

B.S. Electrical & Electronics Engineering | Boys' Town Jerusalem | 2020-2022

Relevant studies: hardware/software integration, C, Python, Assembly, VHDL, microcontrollers, PCB design.

LANGUAGES

Hebrew: Native | English: Fluent
