PROFILE

Full-stack developer and technical implementation professional with hands-on experience across CRM/business systems, REST APIs, databases, cloud delivery, QA, production troubleshooting, client support and rollout. Comfortable translating requirements into workflows and systems, reproducing issues, debugging across application layers, and coordinating fixes between technical and non-technical stakeholders. Electrical/electronics background with practical software and systems work.

CORE SKILLS

Implementation & Support: requirements analysis, onboarding, configuration, rollout, support, troubleshooting
APIs & Data: REST/HTTP, JSON, OAuth, SQL, MySQL, PostgreSQL, MongoDB, Supabase, authentication, RBAC/RLS
Development: JavaScript, TypeScript, React, Next.js, Node.js, Python, PHP, HTML/CSS
QA & Debugging: manual QA, E2E, regression, issue reproduction, Browser DevTools, API checks, root-cause analysis
Cloud & IT: Cloudflare, Workers, R2, Netlify, Firebase, AWS exposure, Docker, DNS, SSL, Windows, Linux, TCP/IP
Business Systems: CRM/CMS, Google Workspace integrations, Microsoft 365/Entra/Intune/AD exposure, AI tools

EXPERIENCE

CodeCrafter | Founder & Full Stack Engineer - Business Systems, Integrations & Automation

- Design and implement CRM platforms, internal systems, portals and automation workflows.
- Translate business requirements into technical configurations, permissions, data models and software features.
- Integrate APIs, databases, email, Google Workspace and third-party SaaS services.
- Troubleshoot frontend, backend, API, database, deployment, DNS/SSL and cloud issues in production.
- Perform QA, rollout support, client handoff, user guidance and ongoing technical support.

IDF Technology Branch | Full Stack Software Developer & Team Lead | 2023-2024

- Developed and maintained full-stack internal systems and databases used in operational workflows.
- Led a small development team and provided technical guidance and issue troubleshooting.
- Worked between user requirements and implementation; instructed electronics students/cadets in a B.Sc. track.

AI Robotics Startup | Software Development Consultant & Mobile Architect | 2024-2025

- Supported cross-platform software delivery and technical operations.
- Investigated issues spanning mobile apps, APIs, backend services, devices and development environments.

VidCo | AV Technician - Technical Support & Operations

- Operated professional audio/video systems and digital meetings with real-time troubleshooting and user support.

SELECTED PROJECTS

CodeCrafter CRM - React/TypeScript, Supabase, PostgreSQL, RLS, Realtime, Google APIs, MFA, workflows.
RAM Engineering CRM - Project/task workflows, role permissions, Supabase, Google Workspace, Cloudflare.
Tov Ha'aretz - E2E QA, publishing flows, permissions, SPA troubleshooting, translations/cache behavior.
Student Transcribe - React/TypeScript, Gemini, Cloudflare Workers, local-first storage and AI processing.
